Subject: MR4 Firmware release for Solidigm™ D7-P5520 and D7-P5620
(formerly known as Intel® SSD D7-P5520 and D7-P5620)

Dear valued Solidigm customer,

This letter is to inform you that Solidigm is pleased to release the fourth maintenance release firmware (MR4) for Solidigm™ D7-P5520 and D7-P5620 for all capacities (1.6TB to 15.36TB) and form factors (U.2 and EDSFF). The 9CV10510 firmware has reached our Quality Release Criteria (QRC) and is ready for your product update.

Firmware binary name: **9CV10510_WFEM0260_signed.bin**

Please refer to the accompanying Sightings Report for known deviations related to the 9CV10510 firmware.

Please note that the firmware and accompanying documentation are Solidigm Confidential and are licensed to you pursuant to the terms under the previously executed CNDA agreement. The firmware included with this message is accompanied by a firmware license agreement that defines the terms, conditions, and restrictions for installing and/or using this firmware. Installing, copying, and/or using this firmware indicates your acceptance of the terms, conditions, and restrictions in the accompanying license agreement. If you do not accept the firmware license agreement, do not install/copy/use the firmware, and return the aforementioned items to Solidigm.

Please contact your Solidigm technical support representative if you have any questions regarding this letter.

Best regards,
Technical Marketing
