Subject: Solidigm™ D3-S4520/D3-S4620 (Formerly Intel®), MR4 (7CV10141) Firmware Release

Dear Customer,

We are pleased to inform you that a new firmware for Solidigm™ D3-S4520/D3-S4620 has been released. This MR4 firmware is for all capacities (240GB, 480GB, 960GB, 1.92TB, & 7.68TB) and form factors (M.2 & 2.5 inch) and is ready to use for your product update.

MR4 contains the below firmware version/binary file for both densities:

7CV10141\_7B1B0012\_GEN-00001\_signed.bin

Please refer to the accompanying Sighting Report for details on the fixed issues in this MR4 firmware release. The firmware has gone through Solidigm's internal validation and passed FRC (Firmware Release Check). Solidigm has no plans to cut this firmware into the factory. The Solidigm Storage tool can be used to update your drives.

Please note that the firmware and accompanying documentation are Solidigm Confidential and are licensed to you pursuant to the terms under the previously executed CNDA agreement. The firmware included with this message is accompanied by a firmware license agreement that defines the terms, conditions, and restrictions for installing and/or using this firmware. Installing, copying, and/or using this firmware indicates your acceptance of the terms, conditions, and restrictions in the accompanying license agreement. If you do not accept the firmware license agreement, do not install/copy/use the firmware, and return the aforementioned items to Solidigm.

Please contact your Solidigm representative if you have any questions regarding this notification.

Best regards,

Solidigm
